CLIPSAL[®]

Light up your senses with ULTI.

Feeling alive. ULTI. The Ultimate Switch.

It brings you to another level of

inspired living ...with light.

iF Product Design Award 2005, Germany

Switch to the Ultimate Switch

ULTI gives you the freedom to create your own lighting in both residential and commercial settings at the touch of a button, letting you change lighting scenes for every ambience and every event. From dinner parties to executive meetings, you control the scene. Each lighting scene can have an unlimited number of switches and each switch can support up to 8 remote control units for multiple lighting scenes.

Retro Quickfit

ULTI's revolutionary EZinstall technology makes installation quick and simple. Amazing but true, installation has no complex rewiring and can be done in 5 minutes. Simply remove your original switch and replace it with an ULTI switch with no rewiring required. ULTI allows retrofitting to fit any existing system and can be changed as your space evolves. Use ULTI to save money and time with easy installation and no rewiring.

A Touch of Art

ULTI is available in our unique range of materials giving you a sensual surface and an artful switch. From classical to minimalist, we have a style to complement your design. From metal, crystal glass, champagne gold, brushed silver and pearl white finishes, to customised materials, we bring art to life in your concept and design. Your unique and creative designs can be enhanced with our changeable cover plates to complement your interior décor. Just take your pick.

ULTI's light touch buttons have a blue or amber backlight that gives out a soft gentle glow and lets you find them easily in the dark. The ultra slim switches have delicate and graceful contours adding a modern and sleek feel to your home, office or hotel design.

ULTI is a refined and elegant choice for your design interior.

A Technological Marvel

Modular Design

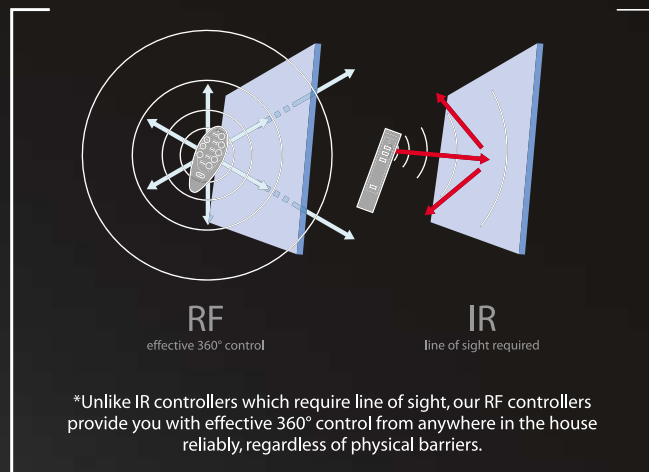

The ULTI Modular Design gives you the most flexibility, making replacement and installation of ULTI switches a breeze. Blending the switch into the décor, blending style with technology.

RF Boundless Communication

Each ULTI remote control can control any light in your home since all the switches are loaded with our patented wireless receivers. Our radio frequency (RF) technology gives you a seamless integration of all your lighting switches.

ULTI gives you the luxury of wirelessly controlling any lighting switches with pre-programmed lighting scenes virtually through walls. The control signals go beyond four walls to cover a remarkably large radius, which lets you literally control the lights from anywhere in a typical 3,000 to 4,000 square foot space.

*Unlike IR controllers which require line of sight, our RF controllers provide you with effective 360° control from anywhere in the house reliably, regardless of physical barriers.

One Touch Scene Control Automation

Expandable, easy to upgrade and easy to programme, ULTI defines the art of fine lighting. Programming couldn't be easier, just set ULTI to programme mode, adjust your lighting, and save it to memory. Lighting scene changes can be carried out anytime according to your mood and taste.

Preset your programmes for romantic dinners, family time or an elegant evening of entertainment. At a single touch, every light will be at your command to bring the occasion to life.

Expandable, Flexible

Designed with Distributed Intelligence, ULTI is easy to upgrade. Every lighting point within the ULTI system is controlled through individual remote control, thus eliminating the hassle of rewiring and ensuring the prevention of a single light or switch from affecting the entire system. ULTI's expandability gives you flexibility to add switches and dimmers to meet your needs as your tastes evolve or as you choose to remodel your home. Easily changeable front cover plates provide further opportunities to create a new style.

Every ULTI switch can accept commands from more than one remote control unit giving ultimate control and flexibility in setting different combinations of lights to meet the needs and desires of every user.

Switches & Dimmers

With no complex components or wiring, ULTI's ultra-slim switch and dimmer will slot neatly into your existing light switch housings. Once installed, you can simply start creating and storing your ideal lighting settings.

Handheld Remote Control

ULTI radio frequency (RF) remote control units offer you 360° coverage and boundless connectivity. ULTI's sleek, stylish, ergonomically designed remote control units are designed to fit into your lifestyle effortlessly.

FreeLocate Switches

FreeLocate Switches enable remote operation of lighting moods. They are wire-free, battery operated and can be attached to virtually any surface and position including glass and other smooth materials.

Lamp Dimmer

In no time at all, the innovative ULTI lamp dimmer can just as easily be integrated with your table and other free standing lamps.

Socket Series

The power, data and TV wall sockets come in a range of colours and materials which are also identical to your ULTI switches and dimmers, achieving a beautifully coordinated design motif throughout.

Let **light** caress
your **senses.**

System/Product Selection

step One

Select switch and dimmer base units
(depending on wattage of number of circuits)

e.g 2 gang dimmer = [U202DST600001](#)

step Two

Select required cover plate and finish

2 gang dimmer cover plate = [UC22DM](#)

Crystal glass finish = [201](#)

Cover plate complete = [UC22DM201](#)

step Three

Select additional products such as table lamp dimmers
or matching accessories like socket outlets (if required)

Lamp dimmer = [U101DFR400XBL1](#)

step Four

Select remote control options

Choose from freelocate or remote control options
(depends on number of scenes etc to be controlled)

e.g. 5 key handheld control = [U105RHH001BPW1](#)

Switch

CATALOGUE NUMBER	DESCRIPTION
Universal Voltage Switches Without Covers	
U201SRV2KW 001	1 Gang 2000VA Switch, 100/240V, 50/60Hz
